

ABA Pro Builder

As a curriculum companion, [ABA Pro Builder](#) offers flexibility in its integration into academic programs. It can serve as an optional supplement or be integrated as a required course component. Its use can enhance classroom discussions and activities, reinforce key concepts, and provide students with valuable resources to supplement their learning outside of class. Customizations and recommendations can be provided for seamless integration when embedded as a required element of a course.

ABA Pro Builder Brief Description: A study package to enhance student learning and prepare individuals for certification exam success. ABA Pro Builder offers a range of features designed to provide thorough assessment, targeted learning, meaningful practice, and valuable feedback. ABA Pro Builder offers two unique full-length mock exams with overall and content area-specific score reports, detailed question-specific feedback, and 920 additional practice questions.

Features of ABA Pro Builder, [customization](#) options, and [recommendations](#) for embedding into a course:

1. Pro Pretest – Full-length Mock Exam 1 provides:
 - A comprehensive assessment of current knowledge and exam readiness through content area and overall scores.
 - Valuable insights into strengths and areas for improvement to build a study plan.
 - **Customization option:** Add a time limit to match the certification exam.
 - **Recommendations:** have students complete the pre-test early in the semester. Add a time limit of 4-hours to match the certification exam. This will serve as a baseline measure. Have students complete the pre-test at the beginning of the course as homework or as an in-class assignment. Discuss the [purpose](#) of mock exams and how to [create a study plan](#) in class. For homework, have students write a “reflection” detailing their score report and their thoughts on their areas of strength and deficit, and create a study plan based on pre-test scores. Have students [monitor their progress](#) on mock exams and content area practice sets throughout the course.
2. Nine Content Area Pro Pack Modules include:
 - Mission Fluency

- Fluency building digital key term SAFMEDS
- Key term quizzes
- **Recommendations:** Students will benefit from building their key term fluency before attempting questions and further study. Advise students to practice see/say SAFMEDS daily and chart their progress on a Standard Celeration Chart or other graphical display. Use the key term quizzes as a graded course component or have students do oral check-outs for each content area module. Oral checkouts can be done with a peer or the instructor.
- Mission Mastery
 - Ten unique petite mock exams per content area, three attempts per mock.
 - 1 question per task on each petite mock exam, 5-22 questions each.
 - Question-specific feedback for enhanced understanding.
 - Content area mixed practice
 - **Recommendations:** Divide the 10 available petite mock practice sets for use before, in class, and following class. Review sets and feedback in class. Have students create a study activity for each item they get wrong. For example, they could describe their error and identify source material (e.g., location in Cooper) for the topic/content they answered wrong. Alternatively, have students create unique examples for any topic/term/concept they got wrong and provide a source reference of where they studied the content. Review assignments in class, having the student describe the question and their process for clarifying the content (e.g., I got X question wrong. I was confusing X and Y. I read Cooper pages A-B and now understand that...). Consider using one of the petite mock sets or mixed practice in the content area as a graded assignment.
- Mission Intel
 - Cooper textbook readings correspond with each task to streamline study processes and help learners identify relevant study materials.

- Mission Assets
 - Supplemental Materials, including EZ Study Sheets, podcasts, and blogs, for additional assistance with challenging content.
- 3. Roulette-style Mixed Practice:
 - Draw from over 920 Pro Pack Content Area questions for comprehensive practice.
 - **Customization:** Add requirement to score X% prior to accessing the Post-test Mock Exam or Mock Exam 2.
 - **Recommendation:** require students to score 80%+ on this mixed practice before taking the Post-Test Mock Exam.
- 4. Pro Post-test Full-length Mock Exam 1 with Feedback:
 - Assess progress and readiness with another full-length mock exam.
 - Receive detailed feedback to refine preparation strategies.
 - **Customization:** Add time limit to approximate the certification exam.
 - **Recommendation:** Review questions students missed in class. Homework may include requiring students to identify study materials for all missed items or creating presentations to teach topics missed to each other.
- 5. Pro Generalization Test Full-length Mock Exam 2 with Feedback:
 - Solidify knowledge and test-taking strategies with a final mock exam.
 - Simulate exam conditions for optimal preparation.

Learning Management System Hosting: ABA Pro Builder is hosted in ABA Tech's secure Moodle LMS (ABA Tech Academy). Customized LMS branding—including unique cover photos, color schemes, etc. is available.
